

REMARKS

Applicant respectfully requests reconsideration of the present application in view of the foregoing amendments and in view of the reasons that follow.

Claims 42-82 are requested to be canceled without prejudice.

Claims 83-124 are being added. No new matter has been added.

This amendment adds, changes and/or deletes claims in this application. A detailed listing of all claims that are, or were, in the application, irrespective of whether the claims(s) remain under examination in the application, is presented, with an appropriate defined status identifier.

After amending the claims as set forth above, Claims 83-124 are now pending in this application. This system incorporates a position recognition system(GPS) coupled with location based maps that allows a user to generate routing information for locations specified by the user within a specified site and the needed information associated with that specified location. During the pro se interview a demonstration was made of an embodiment of the claimed invention, which was believed by the Applicant to distinguish the claimed subject matter from all cited references of record including U.S. Pat. No. 6,286,145 (Griffiths et. al). Applicant believes that new Claims 83-124 which include amendments based on previously submitted Claims 1-41, to recite subject matter not shown in Griffiths et al, including in combination with other recited limitations, for example " a GPS-supported interactive map to provide navigation capabilities relating to the site as well as a user's location with the specified site to a user " (Claim 83), a "portable computing device" (Claim 94), or "an internal storage device of the terminal device" (Claim 105), are patentable over the references cited in the Office Action dated April 10, 2006, and that the amendments overcome the rejections in the Office Action, under 35 U.S.C. § 102 and 103, as discussed with the Examiner during the interview between the Applicant and the

Examiner on December 20, 2005, the Applicant notes that during the interview the Examiner requested amendment to the title of the Application. The Applicant would agree to an Examiner's Amendment adding the following text to the end of the present title, "For Providing Position-Related Information for Users of the Site,"

It is the Applicant's understanding that in view of the demonstration and distinction of the claimed invention the entry of a Notice of Allowance is forthcoming,

Applicant believes that the present application is now in condition for allowance. Favorable reconsideration of the application as amended is respectfully requested. The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.

Respectfully submitted,

Date: OCTOBER 10, 2006
